| Introduction |

DST01 The signal conditioner incorporates two bright and easy to read LCD displays which indicate process value(PV) and user selected parameter.

Powered by a DC 12 ... 38 V or AC 95 ... 250 V supply. It is fully programmable for linear voltage, linear current, Pt100 and thermocouple types such as J, K, T, E, B, R, S, N, L, U, P, C, and D input. Its fast sampling rate allows the signal conditioner to retransmit the signal faster, the maximum of 3 retransmission with one input.

“ Applications:
Chemical industry / Energy / Oil & gas /
Marine / Water circulation system / Factory
automation / Metal & steel / Cement / Pulp &
paper / Pharmaceuticals / Food & beverage ”
